Attached is a copy of the latest XML Interface schema. Please review and be prepared with comments. We'll first review the changes to the LSMS interface from our last meeting and then we'll review the SOA interface messages.

Here is a summary of the changes that were made:

- Base attributes in the top section of the schema file should be sorted now.
- Naming was changed on some attributes to make them consistent. First char is uppercase, no underscores. Attributes that are only lower case and potentially contain an underscore will be replaced with a 4 character abbreviation in the production schema.
- Enumeration added for TimerType and BusinessType
- Extra "sequence" was removed from:
 1. AuditRequestData
 2. NpaNxxDeleteRequestData

**LNPA Working Group Conference Call
