　　　　　　　Change Orders

o Questions arose during the Change Order discussion portion of the meeting related to the Change Orders that were submitted to the NAPM LLC for SOWs as a result of the September 2016 LNPA WG meeting.

- ▪ New concern was raised about some service providers being impacted by some of the sunset items and it was noted that these providers need to be fully informed of the impacts. Action items were assigned to aid in identifying and informing those service providers.

o Action item 11082016-02: Neustar to refresh the number of service providers impacted by sunsetting items on the sunset list.

o Action item 11082016-03: Based on the results of Action Item 11082016-02, Neustar will determine if they can inform the impacted service providers that they are to reach out to their LSMS/SOA vendors for feedback on the sunset items list.

o Action item 11082016-04: Based on comments from the 11/8/2016 meeting, iconectiv to determine impacts on the testing certification of those sunset items.

o Action item 11082016-05: Neustar to look at the LSMS side of sunset item 3.4 that is related to SV queries and determine what, if any, impact there would be on the LSMS if this were sunset.

o Action item 11082016-06: Service Providers to determine if they use the **CMIP interface** to query their own NPA-NXX filters today.
