

LNPA Working Group Conference Call Agenda

Wednesday, October 14, 2015

Agenda

LNPA Working Group (LNPA WG)
Wednesday, October 14, 2015
10:00 AM – 12:00 PM (EDT Zone)
Conference Bridge – 888-412-7808 23272#

10:00 a.m. **Introductions and LNPA WG Agenda Review – All**

VoIP Number Portability Capability – FCC DA-07-709 – Review, discuss and approve needed changes to the NANC Number Portability Flows so that VoIP Providers to Port In and Port Out Consumers - All

NANC_OPS_Flows_
Narratives v4.2.1 - 07

Vonage has reviewed at a high level all of the porting flows and does not see any material changes needed. As for the VOIP provider definitions, we suggest modifying Class 1 to Read:

1. Class 1: A interconnected VoIP provider that obtains numbering resources directly from the North American Numbering Plan Administrator (NANPA) and the Pooling Administrator (PA) and either connects directly to the Public Switched Telephone Network (PSTN) (i.e., not through a PSTN Service Provider partner's end office switch) or connects via a service provider partner end office switch. In addition Class 1 interconnected VoIP providers must follow the appropriate Wireline-Wireline/Intermodal Flows (Simple or Non-Simple, whichever is applicable) for the LNP provisioning process, serving as the New Network Service Provider (NNSP) or Old Network Service Provider (ONSP), whichever is applicable.

Cont'd **VoIP Number Portability Capability – FCC DA-07-709 – Review, discuss and approve needed changes to the NANC Number Portability Flows so that VoIP Providers to Port In and Port Out Consumers - All**

Integra reviewed the latest NANC Flows Narratives v4.2.1 and the FCC 15-70 VoIP Order. Integra's original opinion was that no updates to the Flows are needed to support the FCC 15-70 VoIP Order. This opinion is based on Integra's understanding that VoIP providers which will obtain direct access to numbers under FCC 15-70 are considered "Class 1" VoIP providers (as currently defined in the Flows) and that the "Class 1" VoIP providers follow the Wireline Flows.

Integra is concerned that other service providers may have different understandings. Therefore, Integra is requesting the LNPA-WG Chairs to review the feedback received to Action Item 090115-02 and determine if there are differing opinions on whether the current definition of "Class 1" already includes VoIP providers which will obtain direct access to numbering resources under FCC 15-70. If there is feedback indicating that there are differing interpretations of the definition of "Class 1", Integra requests the LNPA-WG hold the conference call on October 14th to discuss whether the definition should be updated for additional clarity.

12:00 p.m. **Adjourn the LNPA WG Conference Call**
