Discussion of Alternative Interface (NANC Change Order 372) – All

Review and Discuss changes requested to the FRS, XIS and XML Schema at the September 2013 LNPA WG Meeting.

Discussion of industry testing. Develop Industry Standards for Round-Robin Testing.

010714-02 – Service Providers and Vendors should review the M&P for certificate-related activities in the NPAC XML interface. The M&P can be found on the NPAC secure web site at the following URL:

<https://www.npac.com/npac-user/access-connectivity/npac-xml-certificate-trust-authority>

Additionally, section 3.3 (NPAC Use of Certificates) in the XIS describe how this works from an application perspective.

Reviewers should consult with their information security teams to make sure these procedures are acceptable. In the current process, the NPAC Certificate Authority generates the keys used with the certificate, rather than the local system generating the keys themselves. Reviewers should consider this aspect in particular.
